Quality

## Security

### **Safety Precautions • Avoid accidents**

Always ensure the safety of the passengers; the door automatically and securely closed within 6mm door gap.

## Comfortable

### **Graceful Closing • Comfortable Nature**

When the door is in a half lock state, the electric suction door begins to work, gently tightens the door; avoids the noise caused by the heavy closing of the door and the discomfort caused by the air pressure to the eardrum; farewell to the dull bang, give the user a comfortable driving experience.

## Intelligence

### Simple action • Intelligent self-priming

When the door is closed, the user simply pushes the door to a half lock position, and the suction door closes automatically to ensure the reliability of the door lock.

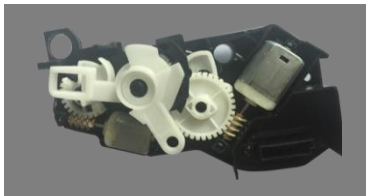

## Precision

IP65 waterproof grade to prevent the intrusion of rain on the electrical absorption lock caused damage.

The force gear adopts high-strength alloy gear, the transmission gears all use high-strength pom material, durable and not easy to burst.

Car-level performance of the Japanese import horse stance Chimada, and the original car perfect match.

The use of pbt+ glass fiber, wear-resistant, not easily deformed, ultra wide operating temperature:  $-40^{\circ}\sim 85^{\circ}$ .
