DIFFERENT BODY CASE

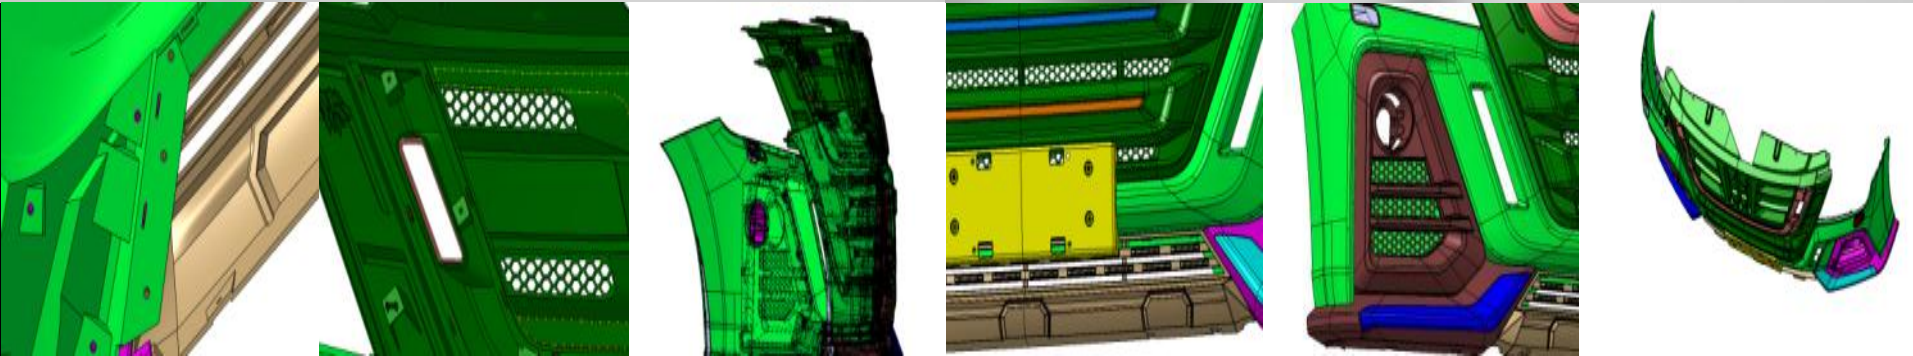

Case Presentation

Reliability

Each component affects the overall industrial design difficulty and production cost. Relying on accurate micron-level 3D scanning data, rigorous design attitude and rich work experience realize seamless connection between components under the premise of ensuring product rationality and safety .

Color Scheme & Coating Craft

Metal Engraving Craft

- The texture changes caused by Seiko carvings are more beautiful than the traditional decorative pieces, which is beautiful.
- The metal is polished and engraved, showing the texture that ordinary paint or chrome parts cannot replace, and it is timeless.
